PROJECTS

Music Recommendation using facial emotion Detection

Team Size: 3

Key Skills: keras Mediapipe openCV

Our project involves developing a facial recognition system that detects faces and trains a machine learning model using the detected facial data. We classify various emotions based on these trained models. The final implementation integrates with Streamlit, allowing us to deploy and interact with the trained machine learning model in a user-friendly interface.

Game Development

Team Size: 2

Key Skills: C++

The game focus on OOPs concept implementation, creating a .h and .cpp file separately and running in Visual Studio

Resume Parser

Key Skills: flask pyrespaser api

My project involves collecting data from resumes and storing it in a CSV file using Eden API calls.
